THIS FREE EVENT](#)

Why participate?

GROWING A DIVERSE HEALTHCARE WORKFORCE

There are many different paths to opportunities in the healthcare workforce. Organizations across the state are working to improve the career path for students in health sciences.

This project helps students find the path that best suits their professional goals, while also striving to build a more diverse workforce that reflects the community to address health disparities and health professional shortages in the state.

The Summit will create a forum for partners to network, strategize, and collaborate to break down barriers in education and the workforce, to keep students moving forward toward their dreams.
